Purpose

AllTrails is designed to inspire and empower outdoor adventurers by making trail discovery and navigation easy and accessible. The platform helps users find and explore trails for activities like hiking, running, biking, and walking. By providing detailed maps, reviews, and user-generated content, AllTrails enhances trip planning and ensures a more informed outdoor experience.

Beyond convenience, AllTrails promotes outdoor safety and environmental responsibility. Whether through real-time tracking, community-driven insights, or accurate difficulty ratings, the platform encourages responsible exploration. Available globally via a website and mobile app, AllTrails connects people with nature while fostering a passion for adventure.

Application Overview

AllTrails is a comprehensive trail-finding and navigation tool tailored for outdoor enthusiasts. The platform features an extensive database of trails, complete with detailed maps, elevation profiles, difficulty ratings, and user reviews.

Users can search for trails based on location, distance, difficulty, and elevation gain, making it easy to find the perfect route for any adventure. The app also allows real-time GPS tracking, route recording, and the ability to save favorite trails for future reference.

With a focus on usability, AllTrails simplifies the trip-planning process while enhancing outdoor experiences. Whether discovering new trails or tracking progress, the app provides valuable tools to support safe and enjoyable exploration.

Testing Scope

1 Testing Types Included

- Sanity
- Positive functionality
- Negative functionality
- GUI
- Testing Usability
- Testing Compatibility
- Testing Interfaces
- Testing Accessibility
- Localization & Internationalization
- Testing Security
- Testing Performance
- Testing Load
- CRUD - Create
- CRUD - Read
- CRUD - Update
- CRUD - Delete

Out of Testing Scope

2 Testing Types Not Extensively Covered

- Testing Recovery & Survival
- Testing Stress

TestRail Screenshots

The screenshot shows the TestRail interface for the 'Explore' section. The left sidebar lists sections: Explore, Nearby trails, Community, National Park guides, Saved, Shop, AltTrails+, Give AltTrails+, Log In, and Trails that fit your nature. The 'Explore' section is currently selected. The main content area displays test cases for 'Explore':

ID	Title	Created By
C1	Check that the Explore main navigation item displays the correct dropdown options	Lahav M.
C7	Check that Explore section loads correctly on slow internet connections	Lahav M.
C8	Check that all Explore links work in incognito/private browsing mode	Lahav M.
C9	Verify that Explore section is accessible via keyboard navigation	Lahav M.

Below this, there are sections for 'Nearby trails', 'Community', and 'Add Case / Add Subsection'. A sidebar on the right shows a tree view of all sections and cases.

The screenshot shows the TestRail interface for the 'Usability Testing' section. The left sidebar lists sections: Explore, Nearby trails, Community, National Park guides, Saved, Shop, AltTrails+, Give AltTrails+, Log In, and Trails that fit your nature. The 'Usability Testing' section is currently selected. The main content area displays test cases for 'Usability Testing' (C254-C268) and 'Security Test' (C269-C270):

ID	Title	Created By
C254	Check that error pages provide helpful navigation back to working pages	Lahav M.
C255	Verify that the site handles network interruptions gracefully	Lahav M.
C256	Verify that concurrent logins on multiple devices work correctly	Lahav M.
C257	Check that the site functions properly with ad blockers enabled	Lahav M.
C259	Check that all forms maintain data when browser back button is used	Lahav M.
C260	Verify that the site works in tablet view (not just mobile and desktop) [iphone SE, ipad Mini, Galaxy z]	Lahav M.
C261	Verify that trail data remains accurate when switching between imperial and metric units	Lahav M.
C262	Check that search works with voice input methods	Lahav M.
C263	Verify that user-generated content uploads (photos, reviews) work on slow connections	Lahav M.
C264	Check that notification permissions are properly requested	Lahav M.
C265	Verify that the site works correctly in split-screen mode on mobile	Lahav M.
C266	Verify that form validation provides specific error messages	Lahav M.
C268	Verify that the site handles daylight saving time changes correctly for trail data	Lahav M.

Below this, there are sections for 'Usability Testing' and 'Security Test'. A sidebar on the right shows a tree view of all sections and cases.

Metrics

As part of my testing efforts for the AllTrails website, I used TestRail to ensure the highest quality and functionality.

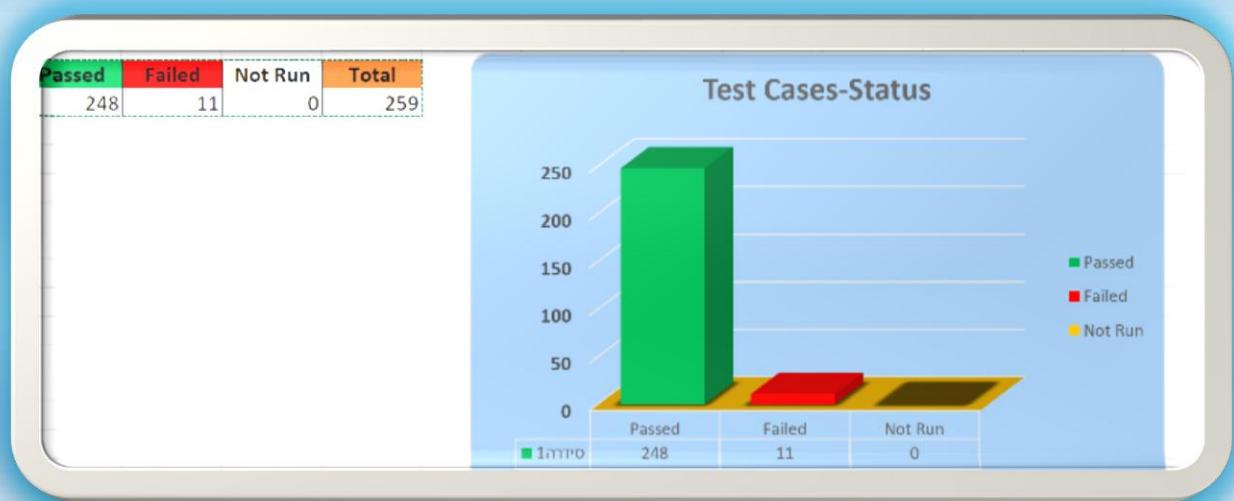

My testing approach included:

1. **Metrics:** I tracked key performance indicators, including the number of tests executed, the pass/fail rate, and test coverage. These metrics allowed me to assess the effectiveness of the testing and ensure all major features of the website were thoroughly tested.

Test Cases status

2. Test Cases Status: Each test case was labelled as Passed, Failed, or Not Run. This provided clear visibility into which features were functioning as expected and which required attention.

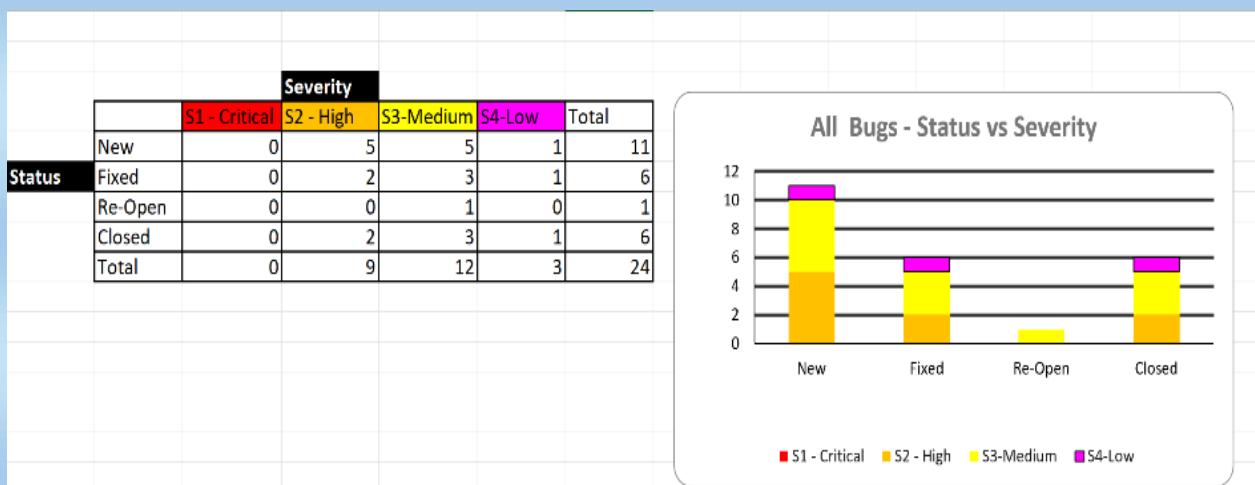

Severity of Bugs

3. Severity of Bugs: Bugs were prioritized based on their impact on the website's usability:

- **Critical:** For example, an issue where users cannot register for a new account or access critical services on the site would be classified as critical.
- **High:** A bug where the trail map fails to display after searching by location or topic. This doesn't block the website but significantly impacts user experience by limiting available features.
- **Medium:** A design issue on mobile where an image doesn't display properly on smaller screens, but it doesn't affect the website's functionality.
- **Low:** For example, a typo in the trail description at the bottom of the page, which doesn't affect overall site usage.

This organized approach ensured that AllTrails users experienced a high-quality, smooth website with minimal issues. My work emphasized precision and attention to detail, ensuring that AllTrails operates at its best.

Recommendations

Critical Tests for Proper Website Functionality:

1. **Redirect to the AllTrails Gear feature:** The redirection to the feature works correctly, but it is located in the lower menu and not in the main menu. It is important to ensure it is placed in a more accessible and convenient location in the main menu to improve user access to this feature.
2. **Clear error messages in the registration fields:** It should be ensured that users receive clear error messages when entering invalid values, in-order to prevent possible mistakes and ensure data integrity.
3. **Password strength indicator:** It should be ensured that users receive the correct notification regarding password strength, and that they can choose strong passwords to avoid security issues.
4. **Accessibility requirements:** It should be ensured that the accessibility menu is available and functioning properly, allowing all users, including those with disabilities, to navigate the site easily.
5. **Support for different languages:** It should be ensured that the search feature works properly in different languages (such as Italian and French), to provide a smooth and efficient experience for speakers of various languages.

Reason: These tests are related to core functions that directly affect the site's performance, user experience, and data security. Any issues or malfunctions in these areas could impact the site's core functions and create a problematic user experience.

Conclusion

BASED ON THE TESTS AND RECOMMENDATIONS PRESENTED, THE WEBSITE CAN BE RELEASED TO USERS, WITH THE ISSUES MENTIONED TO BE ADDRESSED IN FUTURE VERSIONS. THE ISSUES FOUND ARE NOT CRITICAL AND ALLOW USERS TO CONTINUE USING THE WEBSITE IN A PROPER MANNER. HOWEVER, IT IS IMPORTANT TO ENSURE THAT THESE ISSUES ARE FIXED PROMPTLY, PARTICULARLY IN THE AREAS OF USER ACCESSIBILITY, MENU FUNCTION PLACEMENT, AND SUPPORT FOR DIFFERENT LANGUAGES.

I RECOMMEND INCORPORATING THE NECESSARY TESTS AND IMPROVEMENT SUGGESTIONS IN UPCOMING VERSIONS, WHILE MAINTAINING IMPORTANT AND COMPREHENSIVE SECURITY FIXES.

The store's location is not prominent.png

Severity:

Major

Description

Step of Reproduce:

1. Go to URL <https://www.alltrails.com/>
2. Scroll with the mouse to the **Community** category located at the bottom of the page
3. You have reached the location of the **AllTrails Gear store**.

Expect Result:

Clicking on the Shop category in the main (top) menu should open the option to navigate to the AllTrails Gear page.

Actual Result:

In the Shop category, there is no option to access the site's AllTrails Gear. Only by scrolling down with the mouse to the bottom of the page, to the Community category, can you find the link to the AllTrails Gear store

2.1.2 [AP-2] Failed Log-In at slow internet Created: 09/Mar/25 Updated: 10/Mar/25

Incorrect result when typing Jerusalem in Italian.png Incorrect

result when typing Jerusalem in French.png

Severity:

Major

Description

Step of Reproduce:

1. Open URL <https://www.alltrails.com/>
2. Using the SHIFT+ALT keys, select the **French** keyboard layout
3. Type the word **Jérusalem** (Jerusalem) in French in the search field and **press enter**
4. Using the SHIFT+ALT keys, select the **Italian** keyboard layout

- Type the word **Gerusalemme** (Jerusalem) in **Italian** in the search field and **press enter**

Expect Result:

The search Jerusalem works with location names in different languages , Italian & French.

Actual Result:

When I type Jerusalem in the French language (Jérusalem) , it shows the location of Haifa , And When I type Jerusalem in the Italian language (Gerusalemme), it gives the message: "NO RESULTS".

The image consists of three vertically stacked screenshots from a web browser. The top screenshot shows a search result for 'Ramot Menashe' on the AllTrails.com website. It features a large image of hikers on a trail, a search bar with the query, and a section titled 'Local favorites near Haifa' with four thumbnail images. A yellow callout box labeled 'Searching Ramot Menashe With Out Internet' points to the fourth thumbnail. The middle screenshot shows a search result for 'trail/israel/northern-district-hazafon/ramot-menashe-blue-trail-loop' on the same site. It displays a message 'No Result With Out Internet' with a small dino icon and a yellow arrow pointing to it. The bottom screenshot is a file named 'Searching Ramot Menashe without Internet.png' showing the same search result as the middle one, but with a large yellow background overlay containing the text 'No results without internet.png'.

Severity:	Medium
------------------	--------

Description

Step of Reproduce:

1. Open URL <https://www.alltrails.com/?ref=header>
2. Turn off the Internet.
3. In the search field, type the word **Ramot Menashe**.
4. Press Enter.

Expect Result:

The nearby trails section works offline with cached data.

Actual Result:

No results without internet

Attachments Step's 1+2

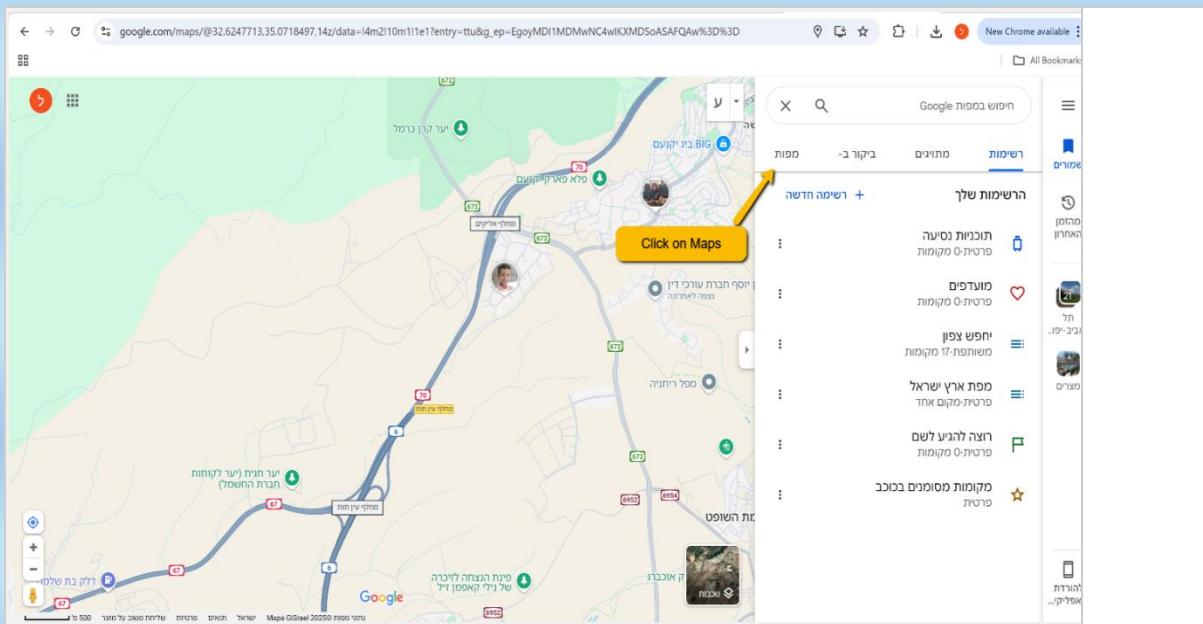

The screenshot shows the Google Maps search results page. The URL in the address bar is https://www.google.com/search?q=Google+Maps&oq=G&gs_lcp=EgZjaHJvbWUqCAGAEUYxg7MggIABBFGCzYOrlCAEQRgnGDsyBggCEUVOzITCAMQlhDARjHARixAvj.... The page title is "Google Maps". The main content area displays a snippet from the Google Maps help center: "טי'ו: הציג תוצאות נבחרת. ניתן גם לקרוא מידע נוסף על סימון לפי שפה." Below this, there are links to "Google Maps" and "Find local businesses, view maps and get driving directions in Google Maps." Further down, there are links to "Google.co.il" and "מפות גוגל", both with descriptions: "איך מופיע דגל זה?", "המוציא למכשירเคล" and "How to view street view on Google Maps?", "What is the app Google Maps?", and "How to find someone's location on Google Maps?".

Step3

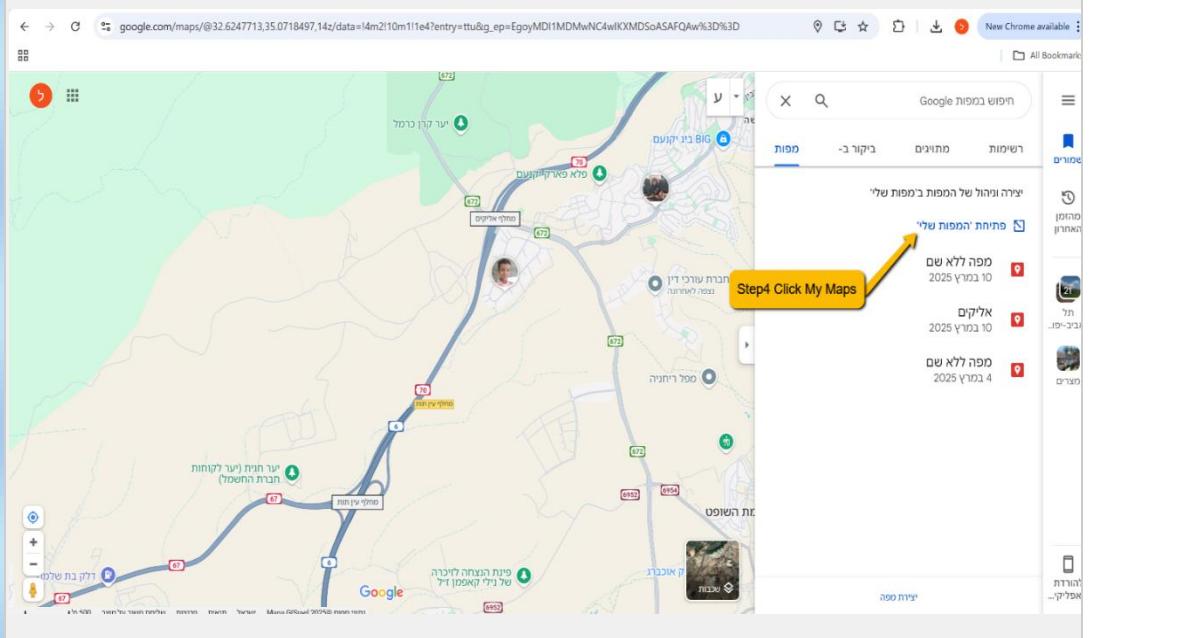

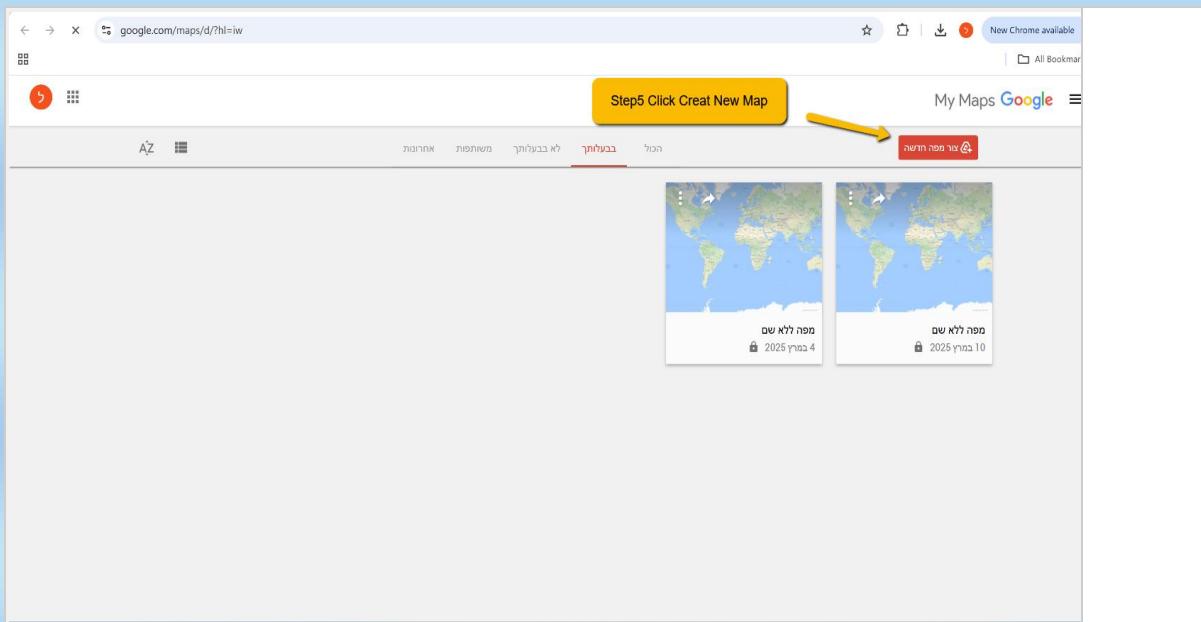

The screenshot shows a Google Maps interface displaying a route from Tel Aviv to Jerusalem. A yellow callout box with the text "Click on Save" points to a button on the right side of the map interface. The map includes various geographical features like hills and roads, and several place names are visible.

Step4 ↑

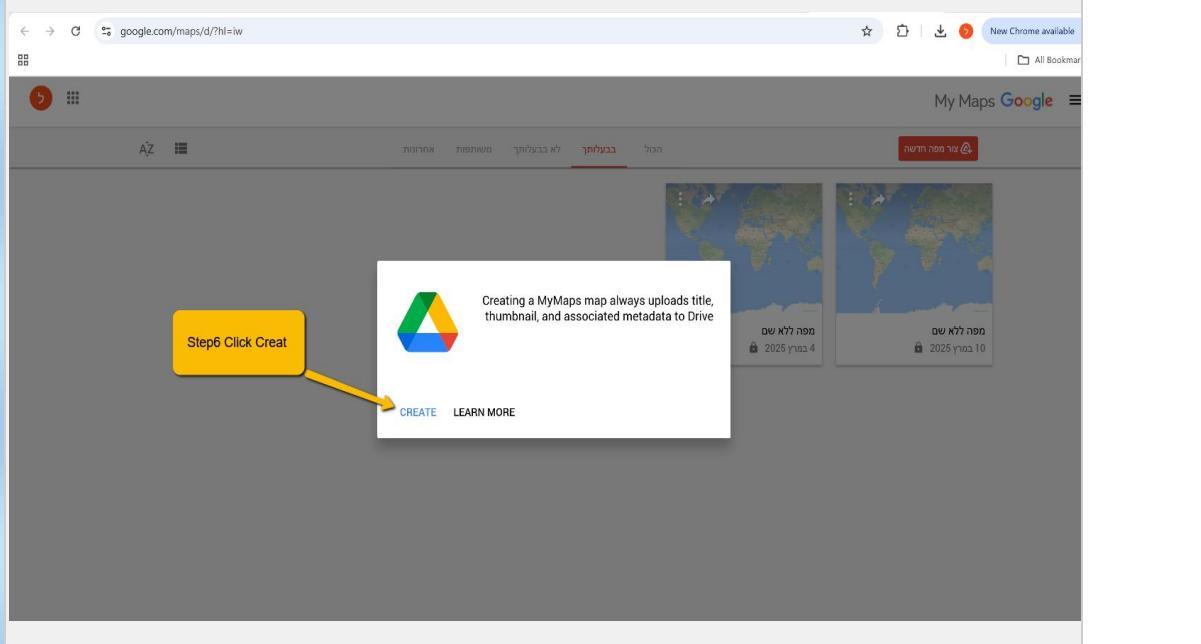

Step5 ↓

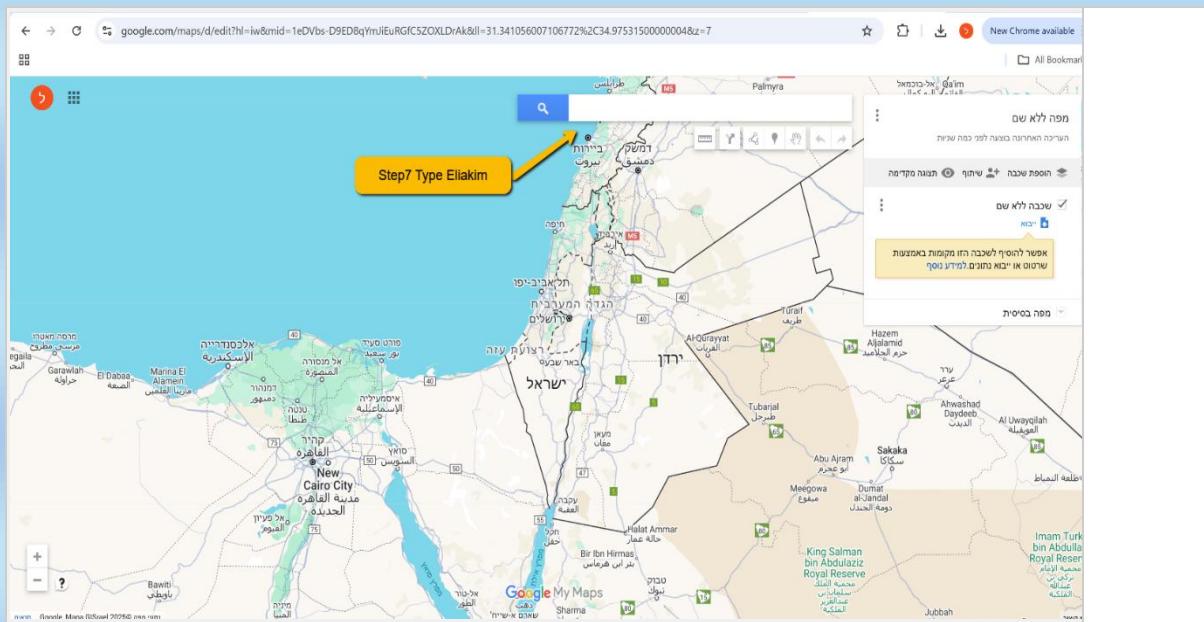

Step6 ↑

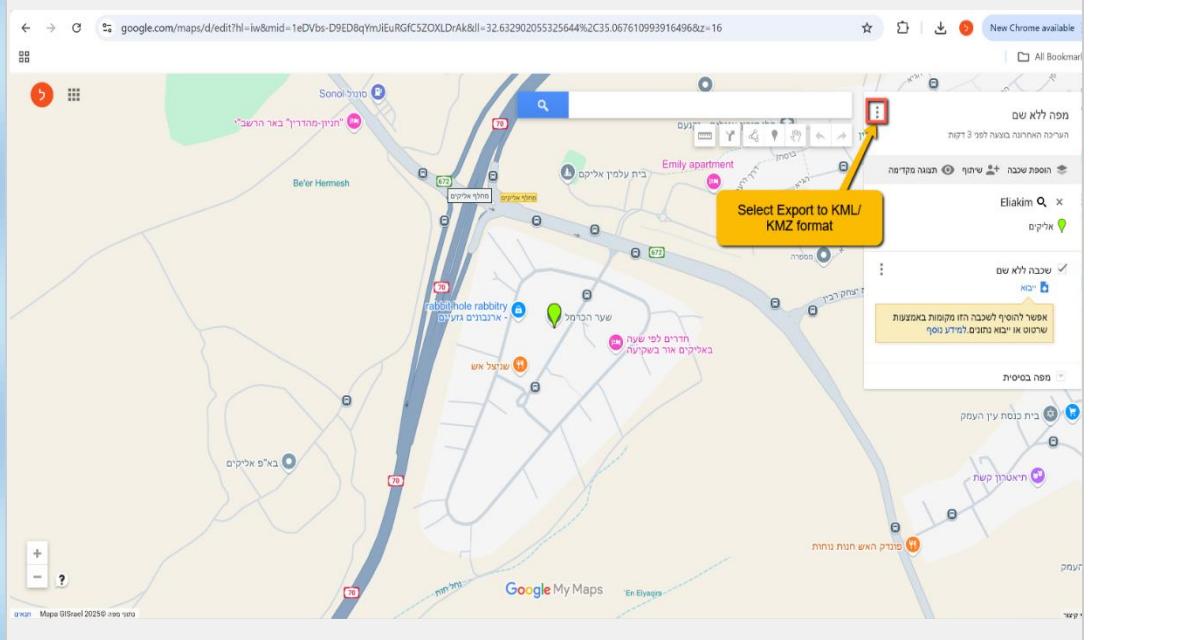

Step7 ↓

Step8↑

Step9↓

The screenshot shows a Google My Maps interface with a map of a residential area. A modal dialog box titled "יציא לפורטט KML/KMZ" (Export to KML/KMZ) is open. The dialog contains two checkboxes: "יש להוור שהגנתנו מודכאים ובמוצעו של KML לשער רשות (שימוש מקוון בלבד)" (Please note that our license is valid for KML only) and "ישו כיבע ומצורע בקובץ KML. לא תונך בכבר הפה". Below the checkboxes are two buttons: "ביטול" (Cancel) and a blue button labeled "הורדה" (Download). A yellow arrow points from the text "Step8 Click Download" to the "הורדה" button.

Step10 ↑

Step's 11+12+13 ↓

The screenshot shows the AllTrails website homepage. In the center, there is a large button labeled "Route Converter". A yellow arrow points from the text "Step9 Click Conveter" to this button. The page also features sections for "Explore", "Maps", "Company", and "Community", along with various links like "Countries", "Regions", "Cities", "Parks", "Trails", "Points of Interest", "Trail Features", "My maps", "Create map", "Print maps", "About", "Jobs", "Press", "Ambassadors", "Affiliates", "Influencers", "Support", "Give AllTrails+", "AllTrails Gear", and "Connect with us" (social media icons).

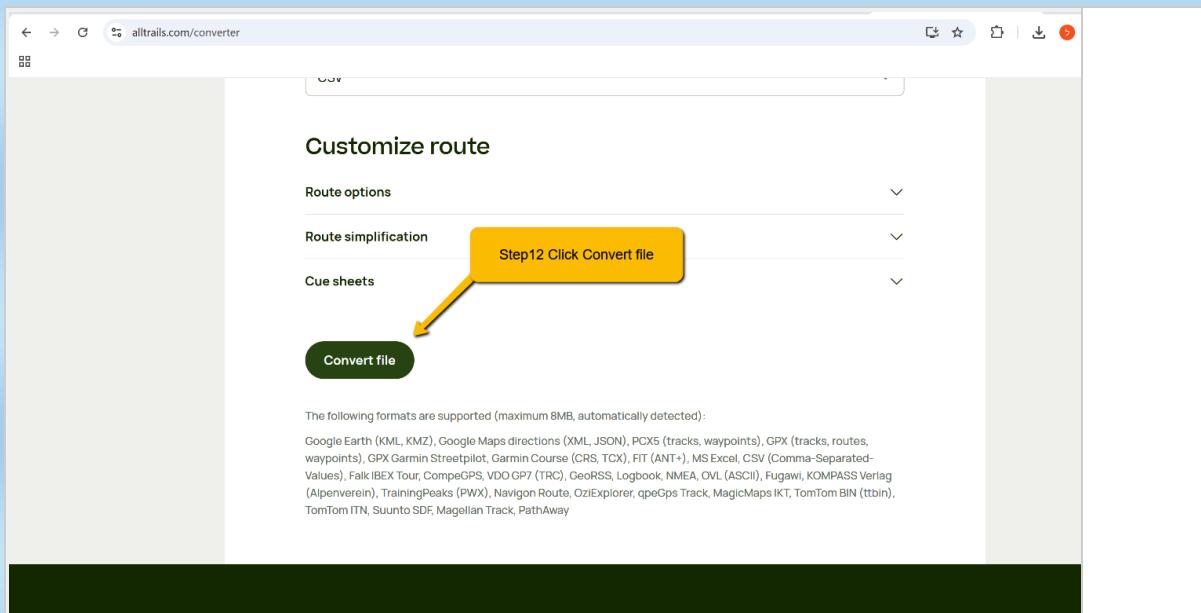

The screenshot shows a web browser window with the URL alltrails.com/converter. The page features a scenic mountain landscape background with the text "Route converter". Below the header, there's a section titled "Upload file" with instructions: "Use the AllTrails Route Converter to upload a route and convert to any of our supported file formats." A link "View supported file formats" is provided. A large input field has a placeholder "Drag supported file here or browse files" and a yellow arrow pointing to it labeled "Step10 Drag Or browse file". Below this is another input field for "Or link supported file here". On the right side of the page, there's a notification bubble for "Capture Saved" with the message "Your capture has bee".

Step14 ↑

Step15 ↓

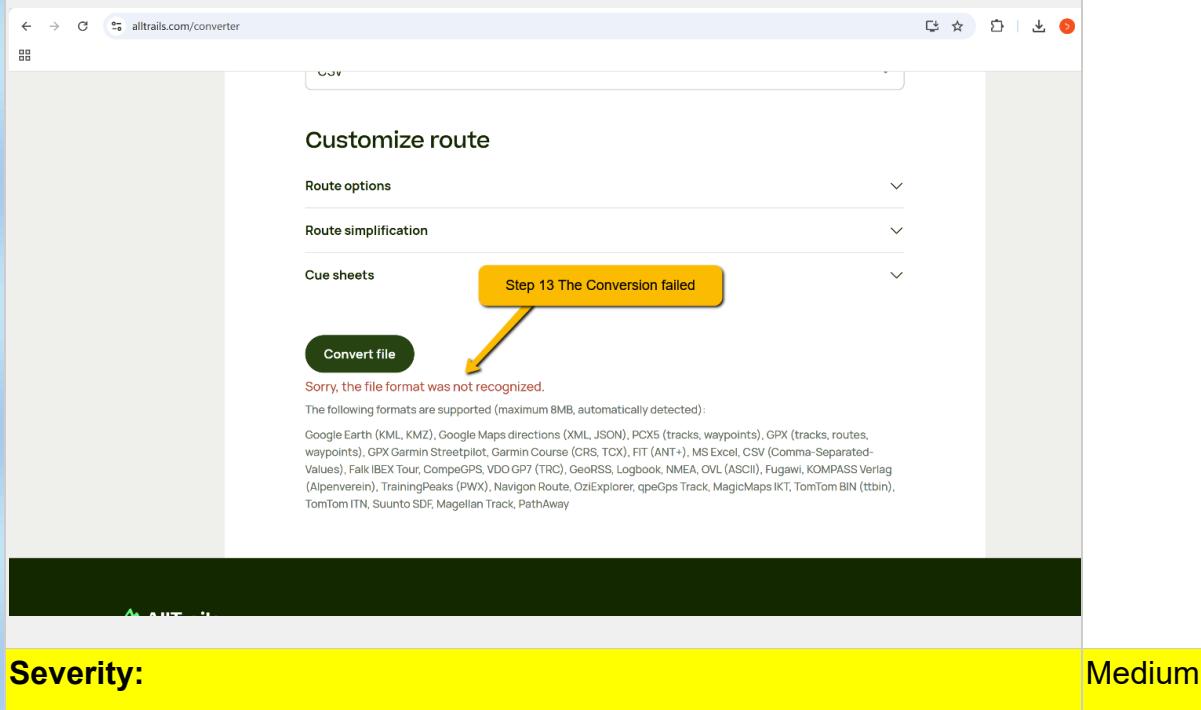

A Windows file explorer window is open, showing the desktop. A file named "Eliakim.kmz" is selected. A yellow arrow points from this file icon to the "Step11 Select the file you saved." label below. The file explorer window also shows icons for Microsoft Edge, Firefox, TechSmith, and Zoom.

Step11 Select the file you saved.

Step16 ↑

The Conversion failed ↓

Description

Step of Reproduce:

1. **Open URL** www.google.com
2. Type: **google maps**
3. Click on **Save**
4. Click on **Maps**
5. Click **My Maps**
6. Click Create **New Map**
7. Click **Create**
8. Type **Eliakim**
9. Select **Export to KML KMZ format**
10. Click **Download**
11. Open URL <https://www.alltrails.com/?ref=header>
12. **Scroll to the bottom of the page**
13. Click **Route Converter**
14. **Drag Or browse** file
15. **Select** the file you saved.
16. Click **Convert file**

Expect Result:

The conversion was successful

Actual Result:

The conversion failed

2.1.10 [AP-10] [The website does not support Windows 7 with Internet Explorer 10](#) Created: 10/Mar/25 Updated: 10/Mar/25

Status:	To Do
Project:	AllTrails Project
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Low
Reporter:	Lahav Mauda	Assignee:	Lahav Mauda
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified

Environment:	Browser: Windows 7 with Internet Explorer 10 Access to BrowserStack Internet		

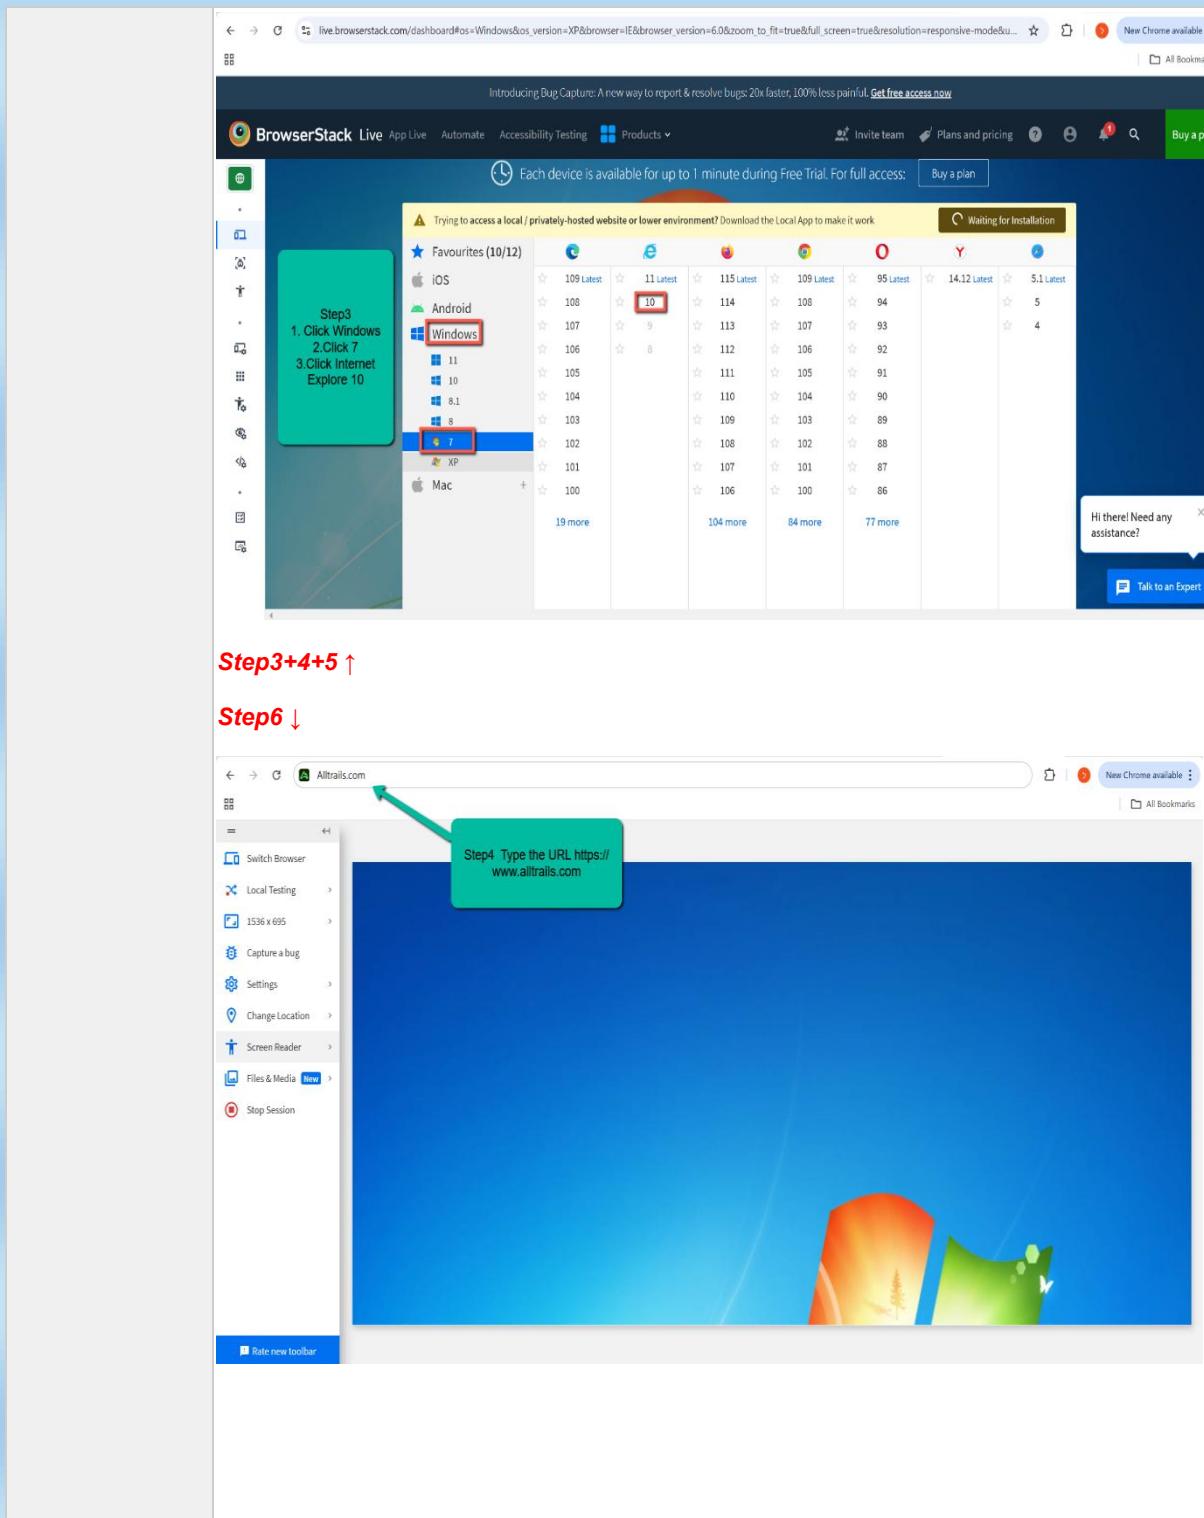

Attachments :	
----------------------	--

Step1

The screenshot shows a Google search results page for "browserstack". The first result is the official BrowserStack website. A red box highlights the "Get started free" button, and a green arrow points from the text "Step2 Click Get started free" to this button.

Step2 ↑

The screenshot shows the BrowserStack homepage. A red box highlights the "Get started free" button again, and a green arrow points from the text "Step2 Click Get started free" to this button.

Severity:	Low

Description

Step of Reproduce:

1. Open URL:<https://www.browserstack.com/>
2. Click **Get started free**
3. Click **Windows**
4. Click **7**
5. Click **Internet Explore 10**
6. Type the URL <http://www.alltrails.com>

Expect Result:

The AllTrails website should open properly

Actual Result:

It is not possible to open the AllTrails website properly.

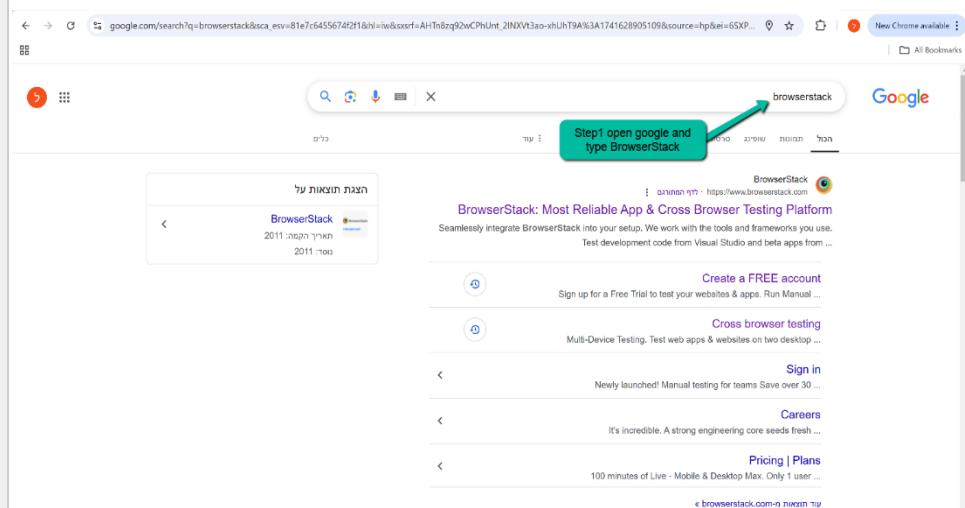

2.1.11 [AP-11] [The website does not support Windows XP with Chrome Browser 39](#) Created: 10/Mar/25 Updated: 10/Mar/25
